TOWN WARRANT

STATE OF NEW HAMPSHIRE

(L. S.)

To the Inhabitants of the Town of Greenland in the County of Rockingham in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at Greenland Central School in said Greenland on Tuesday, the Thirteenth day of March, next at Eight of the clock in the evening, to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing.

2. To raise such sums of money as may be necessary to defray town charges for the ensuing year and make appropriations of the same.

3. To see what sum of money the town will vote to raise and appropriate for the repair of highways and bridges.

4. To see if the town will vote to accept State Aid for the construction and maintenance of Class V roads and raise and appropriate the sum of \$111.42 for same.

5. To see if the town will vote to raise and appropriate the sum of \$450.00 to spray the trees for the extermination of moths and elm tree beetles.

6. To see what sum of money the town will vote to raise and appropriate for the support of the Weeks Public Library.

7. To see if the town will vote to raise and appropriate the sum of \$100. for care of parks and playgrounds.

8. To see if the town will vote to raise the salary of the town treasurer from seventy-five to one hundred dollars per year.

9. To see if the town will vote to adopt the Non-Partisan Ballot System of voting for the election of town officers as set forth in Chapter 22 Laws of 1943 amended.

10. To see if the town will vote to raise and appropriate a sum of money for accident insurance on town employees.

11. To see if the town will vote to raise and appropriate the sum of \$100. for the observance of Memorial Day.

12. To raise and appropriate for economic advancement of the town through publicity and promotional services of the Seacoast Regional Development Association, in cooperation with other regional communities, a sum not exceeding one one-hundredth of one per cent of assessed valuation; namely \$80.00.

13. To see if the town will authorize the Selectmen to dispose of any property acquired by tax sale.

14. By petition of Robert G. Arey and ten others, to see if the town will vote to raise and appropriate the sum not to exceed \$600.00 for the purchase of a piece of land to house the fire truck.

15. To see what action the town will take in regard to letting Mr. George O. Bacon have the so-called Mahoney gravel pit and see what the consideration would be. The pit has been depleted of gravel and the fence undermined.

16. To see if the town will adopt the provisions of Chapter 171-A of the Revised Laws relative to playing games of Beano in this town.

17. By petition of Roger Caswell and ten others, to see if the town will cease to act under the Municipal Budget Act and eliminate the Budget Committee.

18. To see if the voters of the town will authorize the Selectmen to borrow money on short term notes in anticipation of taxes.

19. To transact any other business which may legally come before this meeting.

Given under our hands and seal, this twenty-fourth day of February, in the year of our Lord nineteen hundred and fifty-one.

FRANK G. ROLSTON,
L. B. SPENCER,
G. NEWTON WEEKS,

Selectmen of Greenland, N. H.

A true copy of Warrant—Attest:

FRANK G. ROLSTON,
L. B. SPENCER,

	<hr/>
	\$177.27

Respectfully submitted,

CARRIE W. BECK, Treasurer.

WEEKS LIBRARY REPORT

The work of the Library has been interrupted more than usual during 1950. There were two holidays when it was not open; one evening in January there was a blizzard and on another there was no electricity because of the hurricane and failure of the oil burner prevented opening another afternoon and evening. Otherwise the routine has been followed as usual.

The Woman's Alliance presented a U. N. flag which was beautifully made by Mrs. Page and the trustees bought a very nice U. S. flag to go with it, with a stand and staff for each, so the appearance of the room is much improved.

We have not needed to buy as many books for children and not as much non-fiction as usual because four times during the year the Book Mobile has left with us for several weeks a collection from the State Library. Books are also left at the school so the wants of the children are well supplied.

Statistics for the year are as follows:

Number of new borrowers	26
Total circulation	4,461
Fiction	3,258
Non-fiction	532
Magazines	671
Juveniles	1,466
Number of volumes worn out	8
Number discarded	92
Lost in circulation	4
Stolen	1

Magazines have been contributed by Mrs. Baumgarten, Mrs. Beck, Mrs. Crouch, Miss Carolyn Hughes, Mrs. Irving Rolston, Mrs. Lynam and Mrs. Snider.

Respectfully submitted,
LILLIAN ODELL

GREENLAND VOLUNTEER FIRE DEPARTMENT

The Greenland Volunteer Fire Department was organized last Spring by the Greenland Veteran's Association and has grown into a thirty-two man department. On February 15, 1951 this organization became incorporated in the State of New Hampshire and became an independent group of men interested solely in the suppression of fire in this town. Of the thirty-two men, twenty are active volunteers. These men are on call day and night. The other twelve are on an inactive list and are on call to replace others on large fires. The men have been split into squads who were trained this past summer and fall to handle the working of the tank truck in an efficient manner.

The truck itself is equipped with a 500 gallon frontend pump which can increase the hydrant pressure from 40 to 150 pounds which enables the men to throw a stream of water onto the roof of the highest building in town. With this increase of pressure the department can use its fog nozzle which is part of the equipment found on the truck. The truck also has a 150 gallon booster or tank pump from which the 800 gallon tank of water carried on the truck can be pumped onto a fire at a pressure of 125 pounds. The department has other small fire fighting equipment found on most fire trucks.

The first test for both men and equipment came last fall at North Hampton when the barn on the Fuller Farm burned. At this fire the Greenland truck pumped 6,000 gallons of water and played a large part in preventing further damage to the property. The volunteers made two calls to the Shapleigh home for chimney fires then a call came from Epping, N. H. for a large saw

mill fire at which the Greenland truck was not needed when it arrived.

On Thanksgiving morning the Greenland truck was called to the home of Frederick Stoddard for a barn fire that was beyond the control of the combined efforts of Portsmouth, Newington and Greenland, and as the result the entire barn was burned flat. However, the Greenland Volunteers spent 7 hours on that fire soaking down the remains and went back on the following Sunday and cleaned up the site.

A call came from the Portsmouth Fire Department to assist at a fire at the Beane homestead in Newington. This gave the department a chance to help pay back to Chief Holden and his men for the hours they served us.

In closing, the Greenland Volunteer Fire Department wishes to make clear to the townspeople that the formation of this organization does not mean that the fire protection from Portsmouth and Newington will cease. The Portsmouth and Newington Fire Departments have in the past and will in the future come to your fires.

Respectfully,
ROBERT G. AREY,
Secretary - Treasurer.

ROGER W. CASWELL,
Chief.

REPORT OF THE WATER BOARD

Report No. 2

Proposals For Extending Greenland Water Lines

In our first report as printed in the 1949 TOWN REPORTS we outlined the requirements for extending the water mains an additional $3\frac{1}{8}$ miles. This was based upon the idea that the entire cost would be borne by the town.

Since then we have altered our opinion somewhat in the matter, after having obtained data from Portsmouth in regard to their costs of operating the system as a unit, which includes Greenland. No costs are kept of Greenland alone. All their work including extentions that they make are paid for from water sales, either directly or on Bond payments. Their total sales of water in round figures during 1949 was 725,661,000 gal. of which 193,032,000 gal. was pumped by Greenland, or 26.6%. The complete cost of operating the system (bond payments and obsolescence on properties) was \$144,000 and the revenue was \$148,000 indicating a surplus of \$4,000. for the year. Newspaper quotes, from city council meetings have stated that after 1951 all but \$5,000 of the outstanding bonds will have been paid and that \$25,000 would be available to float another 20 year bond issue for a proposed Elwyn and Lafayette road extention. Other council reports state \$15,000 surplus would be available and also the report that \$27,000 surplus would be had each year. Assume the minimum surplus of \$15,000 were to be had for the purpose of comparison and their estimate of \$7,500 required to carry another bond, there would remain \$7,500. for other purposes.

As PLAN I — we would suggest to Portsmouth a portion of this sum or \$2,800 yearly be used for a bond issue to extend our mains $3\frac{1}{8}$ miles in the belief that such an extension which would take in 40 present houses would prove fully as profitable (as time run on and additional houses were constructed) as any suburban extension that might be made within the city limits.

A 2nd PLAN — that we had considered, but which hardly seems desirable after thinking it over in detail, was that of purchasing the entire property within our town limits (provided Portsmouth agreed) by a bond issue large enough that would also put in the $3\frac{1}{8}$ miles of pipe line in addition to a purchase price, for the purpose of selling water at wholesale to Portsmouth. Originally the cost of the Greenland job supplying water to the Portsmouth stand pipe was borne mostly by the Federal Government, for which they contributed \$125,000. and Portsmouth put in about \$30,000. It would be necessary to have a 20-year contract with Portsmouth to continue to purchase as much water as they now take from Greenland to pay up the total bond and operating costs which would be around \$10,400. a year, were we to offer \$30,000 for the system within Greenland. We would have to depend upon Portsmouth for maintenance, as it would not be economical to equip ourselves to care for this comparatively small system. After the 20 years were up, should Portsmouth not require water from this source due to other plans that she might make, we would need at least 400 customers of our own to finance the continuance of the system, which would require about \$5,000, yearly gross. Unless the pressure had been boosted meanwhile by Portsmouth, or a stand pipe of our own had been constructed, this number of customers could not be accommodated. It

is evident then that this uncertainty would make the plan risky to attempt.

A 3rd PLAN — would be one in which we would buy the pipe for the $3\frac{1}{8}$ mile extension and Portsmouth would install it and own it, as was done on the 3-8 mile Exeter road extension in 1944 and where the town of Greenland appropriated the \$2,500. for the pipe. If the cost of the pipe for this proposed extension were around \$30,000 and to be financed by a 20 year bond issue, paid for by some form of assessment upon those supplied with the water service and costing \$2,100. a year to carry, and with Portsmouth's part for placing the pipe as \$10,000, we can assume that from this extension 40 customers would be gained at first and that the extension would be able to take on a total of 300 customers when the pressure were increased in the future to enable them to do so, and as new houses were built. The gross revenue from the sale of water to 40 customers using the ordinary ave. amount of 36,000 gal. a year @ 27c per 100 c. f. (present rate) would be \$520. and with 300 customers it would amount to \$3,900. yearly. The individual water bill per customer averaging \$13.00 for the above amount, would save the customer at least \$8.00 yearly on insurance, assuming that two thousand were carried as an average. His pumping costs would be eliminated, which average \$32.00 yearly as explained farther on in this report, thus indicating a net average saving of \$27 a year for each water customer. Now the cost of carrying the bond is \$2,100. yearly as above stated and Greenland has then furnished $\frac{3}{4}$ of the capital and Portsmouth $\frac{1}{4}$. For this proportion of capital furnished by Greenland, she should be entitled to $\frac{3}{4}$ the gross water sales from the extension, after deducting obsolescence charges on the \$30,000 at 2% or \$600. and this to be credited to Greenland toward re-

ducing its yearly carrying charges on the bond. At first with a \$520 gross sales, this would be scarcely enough to cover the obselescence, but as time went on and the gross approached the \$3,900. mark there would be more than enough to meet all carrying charges and any surplus would belong to Portsmouth. Any deficiency to meet the carrying charges would be made up by some sort of assessment upon all those who were water customers in Greenland, which should be around 115 at first, making an approx. assessment of \$18 a year and reducing itself as additional customers were added. For example when 140 customers were secured from the new extension, the assessment would be less than \$1.00 a year. The property owners to be served by these proposed lines would still show a saving of \$9.00 yearly after an \$18.00 assessment and those already having water service can be considered as fortunate in having received the benefits for several years without having contributed for the service. It would not be considered justifiable to assess the 75 or more tax paying properties outside the zone which could not be served with water.

We would like to point out by the following, that there is a considerable saving over pumping from ones own well by buying from Portsmouth.

For the average family in Greenland having no live stock to water and pumping by power from their own well, about 36,000 gal's. a year on an average, costs about \$4.00 a year to pump and to buy this same amount from Portsmouth costs 27c per 100 c. f or \$13.00, but this is not the entire story. Assume the ave. well drilled today to cost \$400. and the pumping equipment \$350. or a total of \$750. on which the interest loss at Savings Bank rate of 2% is \$15.00 a year, then add the replacement cost of a new pump every 12 years or \$8.00 a year and a yearly ave. repair charge of \$5.00

making a total of \$32.00 a year. In addition another \$8.00 yearly could be charged for a \$2,500. Ins. premium which is directly due to the absence of a Town water system, making a grand total of \$40.00. In this case the water then costs the private well user 83c per 100 c. f, or 56c more than buying from Portsmouth. Now if in addition to this he were asked to contribute \$4.00 more on his tax rate per thousand, being a property owner outside the supply zone that could not have water service and assuming the cost was to be shared by all tax payers in town alike and this property owner were taxed on the basis of a 2 thousand valuation, it would add another 16c per 100 c. f., boosting the cost of pumping 36,000 gal's. of water a year to 99c per 100 c. f. This is one argument against a general tax levy, versus an assessment on water users as mentioned above. Of course the cost of pumping would become somewhat less for larger amounts pumped and greater for lesser amounts, but in no case can a home pumping system compete in the cost of water as supplied by Portsmouth.

The Water Dep't. requires a \$40.00 deposit to put a 5-8" copper lead in from the main to the meter in the cellar, unless the distance is greatly over the average.

To summarize, here are three plans that we have outlined, namely:

1st — For Greenland to see if Portsmouth will put in the pipe we need and to be paid for from the entire systems earnings, of which we are a part.

2nd — To purchase the portion in Greenland by a bond issue and sell water wholesale to Portsmouth and become an independent system and in addition put in our own extension.

3rd — To purchase the pipe for the proposed extension and have Portsmouth install it and to be paid for by a bond issue by assessments on all water users in Greenland together with the use of $\frac{3}{4}$ the gross revenue (after deducting for obsolescence) from water sold from the proposed lines. The extension to become the property of Portsmouth.

Plans No. 1 and 3 seem to be the best to consider, but Plan No. 2 because of doubtful conditions in the future that could develop, probably has little merit.

We are told that Portsmouth has in mind asking for at least a 25% increase in her water rates. If this materializes it would seem that she should be interested in arranging for some assistance for extending lines in Greenland.

It is our intention to outline our plans to the City Government of Portsmouth, for their consideration, as a preliminary in the planning for water.

KENRICK M. NORTON.

REPORT OF SEACOAST REGIONAL DEVELOPMENT ASS'N.

This is one of the six incorporated regional Associations accredited by the State carrying on effective programs of publicity and information through central offices and maintaining a service whereby their cities and towns are brought together through representative citizens as directors in constructive work for economic advancement of their communities.

The Seacoast Association has accomplished much by dignified publicity for the Region, its natural resources, scenic and historical attractions, excellent facilities and services, fine educational institutions and its unsurpassed products of agriculture, industry and marine fisheries.

This far reaching publicity has been instrumental in the creation of more business, the expanded building of taxable property and providing employment. Comparable publicity and effective results would be extremely difficult for any community to accomplish alone and the cost would be prohibitive.

The Association has brought civic and business groups together for promotional objectives and to meet arising problems by proper approach and considerable progress has been realized.

Extensive studies are well under way for preserving the clam and lobster industries.

The shore and beach erosion problem is being given particular attention.

Assistance is being extended for rivers, harbors, and bay improvements, transportation facilities, highways, roadsides, erosion, agricultural fairs, 4-H clubs, green pastures, recreational areas, Coast Guard service, marine fisheries, industrial development, historic attractions, conventions and other important considerations.

The Association is constantly in contact with Local, State and Federal agencies, is well represented on Commissions and advisory boards and is the accepted source of information and assistance in all these connections.

The State appropriates funds to be used for salaries of regional association secretaries. The Associations are called upon by the State as representatives of their respective regions. The cities and towns are relied upon to enable the associations to maintain and improve these services.

School Report

SCHOOL WARRANT

STATE OF NEW HAMPSHIRE

To the Inhabitants of the School District in the Town of Greenland, qualified to vote in district affairs:

You are hereby notified to meet at the Greenland Central School in said district on the 10th day of March, 1951, at 8 o'clock in the evening to act upon the following subjects:

1. To choose a Moderator for the coming year.
2. To choose a clerk for the ensuing year.
3. To choose a Member of the School Board for the ensuing three years.
4. To choose a Treasurer for the ensuing year.
5. To determine and appoint the salaries of the School Board and Truant Officer, and fix the compensation of any other officers or agents of the District.
6. To hear the reports of Agents, Auditors, Committees, or officers heretofore chosen, and pass any vote relating thereto.
7. To choose Agents, Auditors and Committees in relation to any subject embraced in this Warrant.
8. To see if the District will vote to make any alteration in the amount of money required to be assessed for the ensuing year for the support of public schools and the payment of the statutory obligations of the District, as determined by the School Board in its annual report.

9. To see if the School District will vote to repair or dispose of the horse sheds.

Given under our hands at said Greenland, this 23rd day of February 1951.

JARIB M. SANDERSON,
HERMAN W. PARKER,
MARY B. GOWEN,

School Board of Greenland, N. H.

A true copy of Warrant—Attest:

JARIB M. SANDERSON,

BUDGET COMMITTEE

RUTH W. ROLSTON	ARTHUR J. SEWALL
WESTLEY G. DAHL	ALBERT W. HODGES
FRANK G. ROLSTON	JARIB M. SANDERSON

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Greenland, New Hampshire:

I take pleasure in submitting my third annual report as Superintendent of Schools.

The school year 1950-1951 opened with the following personnel:

Mr. Douglas Harlow, Principal & teacher of Grades 7-8.

Mrs. Marion Kenison, teacher of Grades 5-6.

Mrs. Lillian Hodges, teacher of Grades 3-4.

Mrs. Margaret Blakeney, teacher of Grades 1-2.

Miss Mabel Thaxter, teacher of Home Economics.

Mrs. Eleanor Henry, teacher of music.

Miss Nancy Carnegie, school nurse.

There was one change in the teaching staff. Mr. Douglas Harlow, a graduate of Plymouth Teachers College, replaced Mr. Joseph Grilli as Principal and teacher of Grades 7 and 8. This staff by experience and training is well qualified to give the boys and girls of Greenland good training in the various phases of the school program.

It was about a year ago that tragedy in the form of fire struck the school building. The School District was indeed fortunate to have the fire confined mostly to the auditorium and hallways. The members of the School Board and building committee should be commended for the promptness with which the situation was handled and the remodelling and repair work accomplished. It is difficult to realize that only two days of school were lost because of the fire and the rebuilding.

It is also worthy of note that several improvements have resulted. A few of these are the new drinking fountains, improved lighting for the stage, acoustic tile ceiling in the auditorium and the new equipment in the kitchen.

Again I wish to commend Mrs. Mary deRochemont

and her assistants for the excellence of the hot lunch program. It continues to be a valuable asset to the school program.

The Parent-Teacher Association has made several worthwhile contributions to the school. Assistance in the Dental Clinic conducted by the State Department of Health should be especially mentioned. Renewal of the film club membership is very valuable in the audio-visual program. Sponsorship of the hot lunch program for the third year is a fine contribution. Also, the swings and slide for the playground are very much appreciated by the children.

The greatest problem facing the School District is that of housing in the lower grades, especially in the first and second grade room. To date, there is a maximum number of children in this room which a teacher should be expected to try to teach. If in the near future the number should increase to forty or more, something very definitely should be done. An assistant teacher might be a temporary solution to the problem.

Every time that I visit the school, I am impressed with the quality of the work of the building custodian, Mr. J. Adams deRochemont.

I call your attention to the reports and tables which follow and trust that these will be of interest to all parents and citizens.

I wish to thank the citizens of Greenland, the members of the School Board, and the teachers for their fine cooperation and support.

Respectfully submitted,
RAYMOND A. HOYT,
Superintendent, Supervisory

Union No. 16.

Greenland, New Hampshire
January 23, 1951.

REPORT OF SCHOOL PRINCIPAL

To the School Board of Greenland:

It is with pleasure that I submit this report as principal of the Greenland Central School.

I would like to present a review of our school program, and the impressions that I have noted in the past four months as principal of the school.

The school plant is in excellent repair and very adequate for the number of pupils enrolled. This is something to be thankful for at present with the shortage of classroom space and facilities confronting so many communities throughout our state and nation.

At this time I would like to state my high esteem for the faculty and superintendent. They are conscientious, co-operative, and always have the pupil's welfare in view in their instruction and guidance.

The 1950-1951 school activities and programs carried out up to January are as follows: Football games, both intermural and with other schools, United Nations Day Program, Halloween Parties, Education Week for Visitors, Armistice Day Observances, Annual Christmas Program for the whole school, and evening social events for the upper grades. In all instances, our school events have been well attended and are constructive learning processes for the pupils.

The Parent-Teacher appropriation for audio-visual aids has been a great benefit to every pupil. We are indeed fortunate to have such a broad visual-aid program at the school's disposal. The playground equipment, also purchased by the P. T. A., arrived and has been in use on the playground. It has added much to the recreation of the pupils and has been much enjoyed. Again we extend our thanks to the P. T. A.

The hot lunch program sponsored by the Greenland Parent-Teacher Association is one of the best in the state. We are grateful to them, to Mrs. deRochemont, and all of the mothers and friends who have helped make this such a highly successful project. Most of the pupils are taking advantage of this program, and about one hundred meals a day are being served. Our hot lunches include many extras and courtesies made possible by the thoughtfulness of Mrs. deRochemont and the other members of the community.

This year we are publishing another annual or year-book. This book will contain thirty pages of pictures and printed material pertaining to the school and graduation activities. It is a stimulating activity for the seventh and eight grade classes.

I should like to thank the School Board for their co-operation, endeavor, sincerity, and interest in the school plant, pupils and teachers. The School Board has served our needs and interests in ways too numerous to mention.

In our whole education system from the first grade through the Universities it is well to note that the central unit in the growth development of the pupils takes place in the grades from one to eight. It is during the period while they are in these grades that many habits are formed, and attitudes are developed which either contribute to or limit later the physical, intellectual, and emotional life. It is during grades one to eight that the most important changes take place in the physical growth, in the development of emotional stability, in awakening intellectual curiosity, and in acquiring social competence.

Children in these grades learn as a matter of experience in the classroom to have respect for others who might differ from them. They learn to work and play

together. They may acquire freedom from prejudice and develop tolerance in the atmosphere provided in the classroom and on the playground. The responsibility which we hope they may later accept in the family, in the community, and in the state, find their beginnings in a co-operative spirit first learned at school.

Finally, I want to express my appreciation for the community spirit which prevails here in Greenland in relation to the school. This interest, participation, and spirit is something for which many communities strive but very few attain. I hope this spirit will continue, for it is encouraging to pupils, community members, and teachers.

Respectfully submitted,
DOUGLAS C. HARLOW,
Principal.

January 15, 1951
Greenland, New Hampshire

REPORT OF SCHOOL NURSE

To the Superintendent of Schools:

Following is the report of the school nurse from January 1, 1950 to January 1, 1951.

In the spring the school nurse and the state health department nurse held a joint pre-school clinic.

This fall the state dental trailer arrived and the children in the first six grades received the fluorine treatment. The report of the dental hygienist impressed us with the need for individual dental care.

The same program of health supervision in the schools has been carried out — examinations of skin, hair, vision, hearing, posture, teeth and tonsils; follow-up of defects with home visits if necessary; brief health discussions in the classroom as time permitted.

Following is a report of the physical examination:

Number of pupils examined	111	
defective vision	20	corrected 13
defective teeth	92	
defective tonsils	2	
orthopedic defects	0	

All children except one have been vaccinated. He has a medical excuse.

Plans have been made for the children to receive the patch test for tuberculosis in the spring.

I would like to take this opportunity to thank the parents, teachers, school board, and superintendent for their co-operation in our health program.

Respectfully submitted,

NANCY CARNEGIE, R. N.

School Nurse.

Greenland, New Hampshire
January 15, 1951.

REPORT ON HOME ECONOMICS

To the Superintendent of Schools:

The work of the class in Home Economics goes on as usual. The girls have done some very good cooking, even to making raised bread, inspired perhaps by our new kitchen. They always plan, cook and serve their own lunches several times each year. This year we used the new gas range for one meal and found it very satisfactory.

We are planning meals this year with our colored food cards. Then we decide the number of calories, food elements and vitamins we have, and do any rearranging necessary. This seems to be a fairly painless way of learning essentials.

At Christmas time they made candy and filled boxes for the teachers and Mr. and Mrs. deRochemont.

We are looking forward to our sewing this year. We began with one secondhand machine and have progressed to four of the same. These are still doing good work. We have lights for these machines this year which will be a very great help. We also have a new electric machine which we certainly appreciate but find it hard to believe.

Respectfully submitted,
MABEL E. THAXTER

Greenland, New Hampshire
January 15, 1951.

SUPERVISOR OF MUSIC

To the Superintendent of Schools:

A major part of the year's music program consisted of the learning of the fundamentals of music work on part-singing, and the learning of new songs. Some work was done with a rhythm band, and with square dances.

In February special songs were prepared and sung for the parents at a program presented following a Parent-Teacher supper.

Special music was prepared for the Class Day production, "The Show Boat", as well as for the graduation exercises and Baccalaureate Service.

The Christmas program in December contained many Christmas carols and songs.

I hope that as time goes on the love of singing and appreciation of good music will grow, for these mean so much to all of us.

I wish to express my thanks to Mr. Hoyt, the members of the Greenland School Board, the teachers, and parents for their co-operation throughout the year.

Respectfully submitted,

ELEANOR HENRY

Greenland, New Hampshire

January 15, 1951.
